## Tips for Positive Experiences

- ◆ Cook together when you have plenty of time.
- ◆ Cook dishes with less than five ingredients, such as a pizza making assembly line.
- ◆ Teach proper hand washing. Wash hands using running water and soap for 20 seconds (the time it takes to sing the ABC song).
- ◆ Practice math as you measure and stir.
- ◆ First, measure ingredients separately into small containers. Then add them one at a time to the recipe.
- ◆ It can get messy. Enjoy the quality time together and do general clean up later as a chef team.
- ◆ Be adventurous; if time allows, have children practice fine motor skills by pouring cold liquids from small pitchers or mixing ingredients together.
- ◆ Compliment your preschool chef.

**Cooking together** can lead to healthy eating and comfort in the kitchen. A well-rested child and an adult with time and patience are key. Hands-on experiences are a practical way for children to learn and feel like they are helping.

# Put Kitchen Safety First!

- ◆ Be sure an adult is always in the kitchen with the preschool age child.
- ◆ Clean up dangerous spills that could lead to a slip immediately.
- ◆ Plan for tasks the preschooler can safely do in the kitchen.

## A kitchen classroom?

By cooking together, preschoolers learn important life skills like math, language, science, safety, and teamwork!

The kitchen is a great place for a preschooler to explore their five senses by:

- ◆ looking for steam from pots and pans
- ◆ smelling what is cooking
- ◆ listening for the timer to go off
- ◆ tasting the final product
- ◆ feeling the texture of the food in their mouths

## Are they ready for this?

While each child is different, here are some guidelines for what a preschooler can help with based on their age:

### 3 year olds

Pour	Mix	Spread
Wrap	Shake	

### 4 year olds

Peel	Mash	Crack Eggs
Juice	Roll	

### 5 year olds

Cut	Grind	Measure
Grate	Beat egg with Beater
